## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1-4, 6, 7, 27 and 28 are rejected under 35 U.S.C. 102(a and e) as being clearly anticipated by Stein et al.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Art Unit: 2167

Claims 5, 8-26 and 29-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stein et al. in view of either Gopinathan et al. or Anderson et al. U.S. Patent 6,094,643.

As noted above, Stein et al. teach essentially all the elements of the claim invention. However, the reference to Stein et al. is silent on the particular method that evaluates the payment method. On the other, both Gopinathan et al. and Anderson et al. teach using weighted numeric evaluation to determine whether a payment is valid or fraudulent. Accordingly, to use the evaluation system of either Gopinathan et al. or Anderson et al. in the card validity determination of Stein et al. would have been obvious for one having ordinary skill in the art at the time of the invention. The motivation for this modification would have accelerated the detection process in the evaluation of the payment by the buyer in the Stein et al. system.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
